PACKAGING & ENVIRONMENT

What a kit ships in

- Colour-printed or plain carton per kit, master carton with SKU and quantity labels
- Corrugated board with a high recycled content; no expanded polystyrene in the kit boxes
- Inner bags are PE where moisture protection is required, labelled for recycling

Pallets and loads

- Standard footprints 1.2 × 1.0 m and 1.2 × 0.8 m, or as your warehouse requires
- Pallet height and stacking plan confirmed with the container loading plan
- Wooden pallets heat-treated and ISPM 15 marked for export

Substances and declarations

- RoHS and REACH declarations for contact materials, issued per order on request
- No refrigerant gas is shipped with our A/C service tools
- Materials in contact with coolant and refrigerant: brass and POM

End of life

Adapters, valves and hoses come apart for replacement — we keep spares for every SKU so a kit can be repaired instead of replaced. Ask for the spare parts list.
